
OUR PRODUCTS

Discover our technique

Our industrial chains are used in the most different sectors and applications: **agri-food, cereal silos, bricks, automotive, paper mills, wood transport, water treatment, canning, leavening cells, industrial ovens for cooking food, bakery, ice-cream plants, agricultural machinery, pasta production, paternoster, waste disposal and treatment, bucket elevators, drying, conveyor belts, finishing, textiles, iron and steel** in general and many others.

The chain

Discover the composition of our roller chains, the result of a technique refined over a century of experience and oriented towards the highest quality.

The benefits

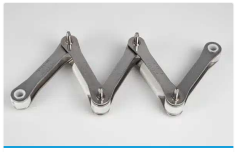
Discover the main benefits of roller chains, both in terms of increased performance and application safety.

How to choose

Discover the key features to choose the best-performing roller chain for your specific application needs.

Materials and processing

In manufacturing roller chains, the choice of the most suitable materials and the workmanship quality guarantee the product's quality.



Lubrication

Appropriate and specific chain lubrication is a prerequisite for the correct functioning and longevity of the chain.

Maintenance

Discover how to properly maintain your industrial chain to ensure a long product life.

Chain Wear

Chain wear results from several very different factors: we will explain the main ones in our guide.

Anti-corrosive treatments

Rosa Catene provides anti-corrosive treatments to protect chain parts from attack by external agents. Our goal is to ensure quality and durability over time.

Degree of precision

Discover the degree of precision of industrial chains according to the reference standards.
